

**It's about service**

**It's about service**

**to clients**  
**to colleagues**  
**to community**  
**to country**

Delivering business strategy  
and mission-critical  
IT solutions and services  
for nearly two decades.

# IT'S ABOUT SERVICE.

1Source is a Veteran-owned, minority-owned, award-winning small business that supports our clients' business and mission objectives by relentlessly pursuing operational excellence and exceeding customer expectations. Simply put,

Based in the Washington, D.C., area with multiple offices across the country, 1Source supports our clients by strategically addressing business demands and offers mission-critical IT solutions and services in program management and control, IT infrastructure and operations, IT management, cyber security, and systems development and engineering.

# SINCE 1999, WE HAVE:

## CHAMPIONED

our clients and their critical mission objectives that support and protect our nation and the American people

## DELIVERED

AND OUR COUNTRY

**Small business.**

# **BIG AMBITION.**

In 2005, lSource created a small business joint venture (Energy Enterprise Solutions, LLC) that was awarded a \$1 billion IT support contract with the Department of Energy—one of the largest federal IT service contracts ever awarded to a small business.

No matter how big the job, we develop, manage, and maintain large-scale IT projects on time, on budget, and within quality guidelines.

# BATTLE-TESTED

IT solutions and strategic consulting services that put service first, resulting in outstanding performance, quality, schedule adherence, cost control, and risk mitigation.

WE BELIEVE TECHNOLOGY  
SHOULD SERVE PEOPLE,  
BUSINESSES, AND COMMUNITIES,  
NOT THE OTHER WAY AROUND.

# SERVICES

## IT & Business Strategy

Our expert, certified, and experienced staff will:

Build and maintain a consistently high-quality and secure computing environment for your user communities.

Work with you collaboratively to support implementation of integrated enterprise-wide operations and capabilities.

Assess potential cyber security risk and vulnerabilities and employ mitigating techniques to stay ahead of dynamic threats.

Maintain continuity of operations, and protect the integrity and confidentiality of your information assets.

Provide a broad range of IT operations support and expertise including:

- Comprehensive IT infrastructure support
- Configuration management
- End-user assistance
- Web development
- Email services
- Disaster recovery
- Contingency planning
- Incident response services
- Systems vulnerability analysis and scanning services
- Risk assessment
- Cyber security
- Software development and engineering

# SERVICES

## Core Technical Competencies

The experience of our technical team spans the full spectrum of IT competencies including:

Rigorous IT project management and control.

Assisting public-sector customers in complying with contractual requirements.

Use of well-established and certified quality management systems.

Effective management and diligent measurement.

Management techniques based on industry best practices and expertise gained through years of hands-on experience.

Use of industry-standard earned value management (EVM) for technical project performance measurement.

All program and project management led by PMP certified project managers.
